Overview

3x more responsivity, 2x the speed and no impact on noise.

The Spyder 3 CL surpasses its predecessor, the Spyder 2, with 3x more responsivity and 2x the speed. At its core is DALSA's dual line scan technology that achieves unprecedented responsivity and throughput rates of 80 mega pixels per second, without impacting noise.

The Spyder 3 CL features the Camera Link serial interface and is fully programmable, offering precise control over key performance variables such as gain and offset.

In addition to its high performance and affordability, Spyder 3 CL also incorporates advanced features such as flat field correction and CDS (Correlated Double Sampling).
